

OUTPATIENT ABDOMINAL ULTRASOUND REFERRAL

Ultrasounds are conducted by a board certified radiologist. We offer this service directly to our referring veterinarians. This service is provided at a special rate for referring veterinarians.

FOR VETERINARIAN USE ONLY

1. The referring veterinarian sets the appointment at AESC on behalf of their client.
2. This completed form and relevant diagnostics and notes **must** be faxed to AESC prior to the appointment.
3. Results go directly to the referring veterinarian for discussion with their client. The radiologist will not discuss results with the client. A CD of the images is given to the client to take with them to their referring veterinarian.
4. The referring veterinarian is invoiced for the ultrasound.
5. The client is invoiced by his/her veterinarian, not by AESC, and pays their veterinarian directly.
6. Patients are required to be fasted after 11pm the night before the ultrasound. No limits on water.
- 7. Please inform client that the patient will be shaved for the procedure.**
8. If the patient requires sedation, options include: a limited scan based on patient compliance, or transferring the patient to our ER/Medicine department to be handled as an in-patient case. Additional charges may apply. The referring veterinarian will be notified to discuss these options with the client prior to proceeding.
